

With the G-STRETCH-System,
you stretch your screen frames in
a simple and professional way.

GRÜNIC

Best results due to the revolutionary G-STRETCH technology.

G-STRETCH 201
DUPLEX clamp

- Grünig IP-system: preliminary requirement for excellent stretching results
- Extremely high retention force for all the commonly used meshes
- Automatic amplification of the closing force
- No parts which require any readjustment
- The clamps are equipped with their own V2A guideway system
- Ergonomic design and handling
- High-quality aluminium construction

G-STRETCH 202
Pneumatic clamp

- A cost-efficient first step into professional stretching
- Modular extension possible in 250 mm / 10" increments p/side
- Pneumatic stretching with highest precision/reproducibility
- Pneumatic two-circuit control panel
- Automatic pre-bowing of the screen frames
- Simple adjustment of the frame profile height
- DUPLEX clamps offering max. retention force
- Automatic stretching system A2 up to 50 programs (optional)

G-STRETCH 210
Mechanical stretching machine

- Maximum frame format of 3000 x 3000 mm / 118" x 118"
- Instant adjustment of the machine size
- Optimum handling and highest precision
- Automatic pre-bowing of the screen frames
- Locking function for pre-bowing of screen frames
- No contact between frame and mesh during stretching process
- A supporting board allows to stretch many frames at the same time
- DUPLEX clamps sliding in V2A guideways

G-STRETCH 215A
Pneumatic stretching machine

- Maximum frame format of 3000 x 3000 mm / 118" x 118"
- Instant adjustment of the machine size
- Automatic pre-bowing of the screen frames
- No contact between frame and mesh during stretching process
- Pneumatic stretching with highest precision / reproducibility
- A supporting board allows to stretch many frames at the same time
- DUPLEX clamps sliding in V2A guideways
- Automatic stretching system A2 up to 50 programs

G-STRETCH 270A
Electro-mechanical stretching machine

- Maximum frame format of 1500 x 1500 mm / 59" x 59"
- Instant adjustment of the machine size
- Optimum handling and highest degree of precision
- Automatic pre-bowing of the screen frames
- No contact between frame and mesh during stretching process
- A supporting board allows to stretch many frames at the same time
- DUPLEX clamps sliding in V2A guideways
- Automatic stretching A2 with touch screen control and 50 programs

G-STRETCH 281A
Multiscreen stretching machine XL

- Maximum stretching surface of 4500 x 12000 mm / 177" x 472"
- High yield with a minimum of mesh consumption
- Simultaneous handling of several screen frames (Multiscreen)
- Adjustable stretching speeds for warp and weft directions
- No contact between frame and mesh during stretching process
- Easy setting of the desired stretching angle
- DUPLEX clamps sliding in V2A guideways
- Automatic stretching A2 with touch screen control and length measuring system
