

G-LINE system: guarantees maximum performance when cleaning, coating, developing and drying the screens as well as for water recycling.

Grünig

G-LINE technology: the perfect solution for your perfect screen.

G-WASH 140 IN-LINE screen cleaning system

- For maximum screen formats of 2800 x 7000 mm / 110" x 276"
- Automatic IN-LINE screen cleaning: washing, de-coating, de-greasing and rinsing
- IN-LINE throughput system, permanent screen transport
- Compact construction requiring only a minimum of space
- Working without risks, optimal handling
- Touch-Screen Terminal offering 50 programs
- V2A special nozzles designed for ease of maintenance, with service cover
- Integrated tanks for solvents, de-coating products and recycled water
- For solvents with a flashing point of >55°C / 131°F, ATEX-compliant construction method

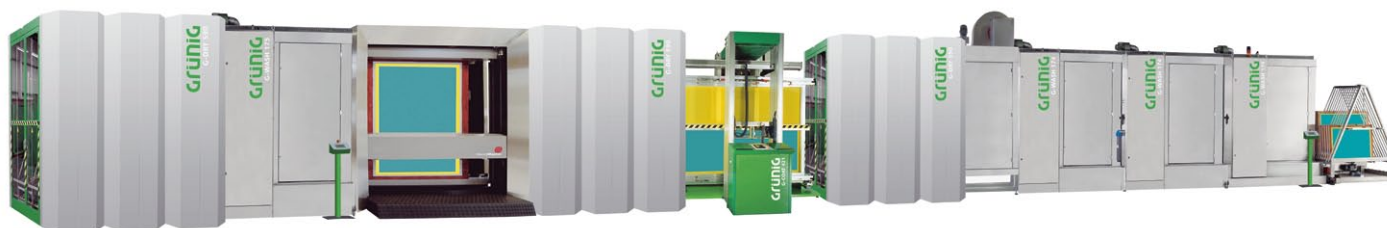

G-WASH 170 IN-LINE screen cleaning system MODULAR

- For maximum screen formats of 2400 x 5000 mm / 94" x 197"
- Automatic IN-LINE screen cleaning: washing, de-coating, de-greasing and rinsing
- IN-LINE chamber installation, timed screen transport
- High degree of flexibility thanks to a modular design
- Completely closed washing chambers made of stainless steel V2A
- Minimal loss of chemicals = low operating costs and long service life
- Loading and unloading feeders G-LINE 190 (option)
- Preliminary drying by means of the air blower module G-WASH 179 (option)

- Cabinet dryer G-DRY 590 complementing the feeder technique (option)
- Touch-Screen Terminal offering 50 programs
- V2A special nozzles designed for ease of maintenance, with service cover
- Integrated tanks for solvents de-coating products and recycled water
- For solvents with a flashing point of >55°C / 131°F, ATEX-compliant construction method

G-LINE IN-LINE screen production system MODULAR

- For maximum screen formats of 2400 x 5000 mm / 94" x 197"
- IN-LINE installation concept including various screen processes
- Automate, standardize, reduce costs and enhance flexibility
- G-WASH 174: Screen cleaning
- G-WASH 040: Water recycling
- G-DRY 590: Screen drying
- G-COAT 425: Screen coating
- G-LINE 190: Magazine feeder technique
- Combined with CtS systems (Computer-to-Screen)
- G-WASH 175: Screen development
- Touch-Screen Terminal guaranteeing an optimal control of the installation
